RECENT GRANTS/CONTRACTS:

Multicenter Clinical Trials

A randomized double-blind safety and immunogenicity study of three production lots of Diphtheria - Tetanus Toxoids - Acellular Pertussis Vaccine and Haemophilus B. Conjugate Vaccine (Tetracel) in toddlers at 12-18 months of age. Principal Investigator. August 1995 through December 1995. Amount: 5,500.00.

Linezolid (PNU-100766): Pharmacokinetics in pediatric patients following intravenous administration. Principal Investigator. August 25, 1997-August 25, 1998.

A randomized, comparative study of alatrofloxacin vs ceftriaxone with optional vancomycin in children with bacterial meningitis (Protocol 154-127). Principal Investigator. April 1998-April 1999.

An open-label study to demonstrate bacteriologic efficacy of Augmentin ES in the treatment of AOM due to S. pneumoniae with amoxicillin MIC's ≥ 2 mg/mL (AUG-536 Clinical Protocol). Principal Investigator. March 1999-June 2000.

An open, intravenous study to evaluate the plasma concentration profiles of MK-0826 in patients aged 3 months through 17 years. Principal Investigator. December 1, 1999-December 1, 2000.

An open randomized, multicenter study of the safety, tolerability, and immunogenicity of VAQTA™ given concomitantly versus nonconcomitantly with other pediatric vaccines in children approximately 12 months of age (Protocol 057-01). Principal Investigator. December 1, 1999-December 1, 2000.

RECENT GRANTS/CONTRACTS: (continued)

Open-label, multicenter, multiple-dose, phase III study of the population pharmacokinetics of IV Synercid (7.5 mg/kg, Q8H) in 75 pediatric patients. Protocol RP59500V-324. Principal Investigator. March 1, 2000-January 31, 2001.

A double-blind, randomized, placebo-controlled safety and efficacy trial of a suspension formulation of pleconaril in the treatment of viral respiratory infection in children age 2 to 12 years (Protocol 843-051). ViroPharma. September 9, 2000- January 23, 2001.

A double-blind, placebo controlled, virologic efficacy trial of pleconaril (VP63843) in the treatment of neonates with enteroviral meningitis. ViroPharma. September 19, 2000 - April 26, 2001.

A double-blind, placebo-controlled, virologic efficacy trial of pleconaril (VP63843) in the treatment of neonates with enteroviral sepsis syndrome. ViroPharma. September 19, 2000 - April 26, 2001.

Linezolid vs. Cefadroxil in the treatment of skin and skin structure infections in children. Pharmacia and Upjohn. September 18, 2000 - January 31, 2001.

Pharmacokinetics of cefditoren in infants and children following a single oral dose of cefditoren pivoxil. Tap Pharmaceuticals. September 7, 2000 - March 22, 2001.

An open randomized, multicenter study of the safety, tolerability, and immunogenicity of VAQTA given concomitantly versus nonconcomitantly with other pediatric vaccines in children approximately 12 months of age. Merck. December 1, 1999 - April 25, 2001.

A prospective, randomized study to compare ciprofloxacin (either as oral suspension or as IV or sequential IV® oral suspension therapy) versus control regimens (either trimethoprim/sulfamethoxazole oral suspension, cefixime oral suspension, IV ceftazidime, sequential IV ceftazidime ®PO cefixime) in the treatment of pediatric patients with complicated urinary tract infections or pyelonephritis. Bayer. November 24, 1999 - April 12, 2002.

An open, intravenous study to evaluate the plasma concentration profiles of MK-0826 in patients aged 3 months through 17 years. Merck. October 17, 1999 - June 13, 2003.

RECENT GRANTS/CONTRACTS: (continued)

A pilot, multicenter, open label, non-comparative study of the safety and efficacy of FLOXIN® otic solution in the treatment of acute otitis media twice daily for seven days in children with tympanostomy tubes. Daiichi. November 22, 2002 - August 20, 2003.

An open-label single dose study to evaluate the safety and pharmacokinetics of levofloxacin oral suspension formulation in infants and children (6 months to 16 Years of Age) (RWJ-25213). The R.W. Johnson Pharmaceutical Research Institute. May , 2001 - December 6, 2001.

A single, ascending dose study to characterize the pharmacokinetics of intravenous tigecycline in children. Wyeth. February, 2004 - February 16, 2005.

Safety and efficacy of pentavalent (G1, G2, G3, G4 and P1) human-bovine reassortant rotavirus vaccine in healthy infants (Protocol 006-004). Merck. January 1, 2002 - May 21, 2004.

A multicenter, randomized, open-label, comparative study to compare the efficacy and safety of Levofloxacin and standard of care therapy in the treatment of children with community-acquired pneumonia in the hospitalized or outpatient setting. Johnson and Johnson. February 4, 2002 - November 2, 2004.

A multicenter, randomized, comparative study to evaluate the efficacy and safety of levofloxacin in the treatment of children who have recurrent and/or persistent acute otitis media. Johnson and Johnson. October 4, 2002.

A multicenter, long-term, active-surveillance study of musculoskeletal disorders that occur after initiating a course of levofloxacin (RWJ-25213-097) or non-fluoroquinolone therapy for acute infectious diseases in children who were enrolled in phase 3 clinical trials involving levofloxacin therapy. Johnson & Johnson. February 4, 2002 - open.

A phase III, randomized, placebo-controlled, blinded investigation of six weeks vs. six months of oral valganciclovir therapy in infants with symptomatic cytomegalovirus infection. (CASG 112) DMID Protocol Number: 06-0046 2007- current. (P.I.)

RECENT GRANTS/CONTRACTS: (continued)

A pharmacokinetic/Pharmacodynamic and safety evaluation of oseltamivir (TAMIFLU®) for the treatment of children less than 24 months of age with confirmed influenza infection. (CASG 114), DMID # 06-0059 (sub P.I.) 2007- current.

OTHER COMPETITIVE GRANTS/CONTRACTS:
